United Europe-
A perfect home to live in
March 2014-June 2014

Bulgaria-Latvia-Poland-Romania-Sweden

March

Each country sent traditional Easter recipes from their countries. We saw some similarities and some differences. It seems egg is a popular ingredient!

The Swedish partner skyped on two separate occasions with the Romanian and Latvian friends. Nice as always to see the familiar faces and talk to each other!

April

April was the month for recycling. Each country organized at least one waste material recycling session. Some partners made movies about it, others sent pictures with explanations. The Latvian partners saved a lot of trees by collecting paper for recycling. Good work all of you!

April continued

Romania and Latvia met for a friendly chat over Skype.

It was Sweden's turn to host the partnership from April 2 until April 8. Students and teachers met for a nice, but somewhat cold and windy week. We went to several places of interest, such as Universeum science center in Gothenburg and Grimeton Radio station (which is on UNESCO's world heritage list). We also visited schools and took part in lessons among other things.

May

This month it was time for another cooking session. It was surprising to see how many common recipes the countries share!

All the countries met for a common Skype talk. It was fun talking all of us together at the same time! Especially since we knew we would meet just a few days later.

June

The sad time of closing the project had come. All the partners were busy with doing all the finishing work.

We met for one final meeting in Romania. It was a wonderful week, even though very emotional since we knew this was the last meeting for "United Europe- a perfect home to live in". A lot of dissemination was done in Romania but we also had time to see many places of interest such as Salina Turda and Alba Iulia. We also visited many schools and got to understand the educational system of Romania even better.

Thank you Petronela for a great week!

Thank you all for being such wonderful people and for making such a great project during these two years!

The End
